**“CREATIVITY IS
INTELLIGENCE
HAVING FUN.”**

-ALBERT EINSTEIN

At TEKI, we believe that technology should be an integral and integrated component of the educational process and curricular programs for all ages. We use an interdisciplinary and collaborative approach that will inspire creativity and expertise in all digital media areas. TEKI challenges each learner to develop creativity and a sense of responsibility toward others, both within the educational process and in the community at large. At the same time, we encourage our learners to become future teachers and create a growing culture of technological leaders. Our vision is to prepare a community of successful innovative learners for active citizenship, successful career exploration, and further education beyond our services.

Here is what our typical day looks like...
