“CREATIVITY IS INTELLIGENCE HAVING FUN.”

-ALBERT EINSTEIN

At TEKI, we believe that technology should be an integral and integrated component of the educational process and curricular programs for all ages. We use an interdisciplinary and collaborative approach that will inspire creativity and expertise in all digital media areas. TEKI challenges each learner to develop creativity and a sense of responsibility toward others, both within the educational process and in the community at large. At the same time, we encourage our learners to become future teachers and create a growing culture of technological leaders. Our vision is to prepare a community of successful innovative learners for active citizenship, successful career exploration, and further education beyond our services.

OUR LEADERSHIP TEAM

After 25 years in the education and camping industry, Howard Weinrib, the founder of TEKI, is excited to extend his successful technology programming to the Florham Park Sports Dome this summer.

For almost a decade, Howard has run a technology summer program that he launched in Montclair, NJ. In the fall of 2015, TEKI (which stands for Technology-Education-Knowledge-Instruction) introduced a variety of its after-school technology enrichments to many families in New Jersey. Howard believed that incorporating his original technology program with the topnotch facilities at the FPSD would be invaluable to his dedicated campers.

Now, after popular demand, we are in our 8th Summer! Providing a fun and creative environment for children grades 2-8, we focus on science, technology, engineering, arts and mathematics. Our certified teachers engage our campers through state-of-the-art technology and hands-on instruction in our 21st century facility.

Our team is a collection of wonderful, certified teachers and young experts who continue to excel in science, technology, engineering, arts, and mathematics. They have been growing with us for years and we truly value their hard work and dedication. We know that our campers enjoy them as much as we do.

Campers will be assigned one head team leader, but they will experience all of our camp leaders as they move from one specialty to another..

TEKi
